9120

raspberry harvester

Customized Picking

Orbirotor® System: The Korvan brand pioneered the rotary picking style with our Orbirotor and Dynarotor picking heads. **The Orbirotor utilizes an orbital shaking action in a free floating head delivering less plant damage than a fixed head design.** This versatile head can selectively pick both your raspberries and blueberries, giving you more flexibility during the harvest and saving you the extra cost of adding another machine that will only pick one crop!

Features

- 31 gallon fuel tank
- Plus+1 Display Control system

Options

- Large tires
- Auto height
- Auto steering
- 25 or 15-inch side deck

9120

IQF Harvester

Oxbo is proud to introduce the new model 9120, designed to harvest IQF raspberries. Working with industry experts, Oxbo design engineers built the 9120 with a fruit delivery system focused on maintaining the highest possible fruit quality from the plant to the flat.

Superior Fruit

The 9120 delivers several features aimed at maintaining your fruit quality:

- **Minimal drops, minimal drop height:** Minimal fruit transitions and the lowest drop height increase quality.
- **Two-Stage fluid bed cleaning system:** The push-pull cleaning action of the 9120 blows air from the bottom and sucks air from the top to efficiently and effectively remove debris while remaining gentle on fruit.
- **Orbirotor® system:** Rotary style head set the industry standard. It

moves freely with the plant and gently removes ripe berries.

Superior Quality

The Oxbo 9120 raspberry harvester features a reliable Kubota® 48hp diesel engine. In response to customer requests, the 9120 delivers:

- **Unibody design:** The inspection height remains constant. Also easy to unload fruit.
- **23-inch harvester lift:** To accommodate all field setups.
- **Short wheel base:** Delivers industry leading maneuverability.
- **Plus+1 Control System:** Easily set harvester height, improved safety, and diagnostics. System can easily accommodate additional functions like GPS and yield monitoring.
- **Rip-stop buckets:** High volume, easy to replace buckets maintain fruit quality.

Side operator platform: Operator has full visibility and easy access. Flow controls to adjust speeds from inspection area

Effective push-pull cleaning system: Blows air from the bottom and sucks air out the top to eliminate any 'pop corn' effect to deliver clean, whole fruit

Orbirotor picking system: Every 9120 comes standard with Oxbo's Orbirotor picking system to deliver high quality fruit

Tight turning radius: Harvester can quickly turn around in tight headlands

Road speed: The 9120 delivers up to 14 mph road speed with two speed wheel drives for better in-field and road performance

Easy engine access: The 9120 delivers easy access to the engine compartment for quick servicing

Additional storage for empty flats: The rear of the 9120 provides an extra 18.2 square feet of storage for empty flats to keep the machine working in the field

Ample On-board Storage: The 9120 delivers 66.4 square feet of storage on the side deck, providing ample room for full and empty flats.
